

# Experience research...

- at UK universities and research institutes
- with practising scientists

Our undergraduate research bursaries are designed for those considering scientific research as a career. They enable students to take part in a defined research project for six to eight weeks of the summer vacation.

Students receive a bursary of £175 a week (£185 London) to make the most of the experience and gain a detailed insight into research.

*"A life changing opportunity. Students showed an enthusiasm for research and excitement for science."*

Sir Richard Brook, former Chief Executive Officer, Engineering and Physical Science Research Council

# Find out more...

Nuffield Science Bursaries inspire students across the UK with over 1,500 funded places a year.

Visit [www.nuffieldfoundation.org/nsb](http://www.nuffieldfoundation.org/nsb) for full details on how to apply.

Lord Nuffield

## About us

"Committed to the careers of young scientists through curriculum development and practical schemes"

The Nuffield Foundation is an independent charitable trust established in 1943 by William Morris (Lord Nuffield) the founder of Morris Motors.

Our aim is to fund research, development and practical experiment in education, science, social science and social policy.

To find out more about our two science bursary schemes for undergraduates and for schools and colleges, please visit our website at [www.nuffieldfoundation.org](http://www.nuffieldfoundation.org)

The Nuffield Foundation

# Experience science...

- on real research and development projects
- with practising scientists

Our schools and colleges bursaries are for students in their first year of an advanced or higher-level science, technology, engineering or maths (STEM) course. They offer the opportunity to join a project for four to six weeks during the summer vacation in any area of STEM.

Students receive a £75 a week bursary, an insight into the world of scientific research and development including areas of technology, engineering and maths, and something that sets them apart from other students.

*"It was a fantastic opportunity and has made me even keener to study science at university."*

Jennifer Kennedy, Bearsden Academy

# Get involved...

Nuffield Science Bursaries are inspiring the next generation of scientists at school, college and undergraduate level. With over 1,500 funded placements each year, there's never been a better time to get involved.

*"The project opened my eyes to the world of science. It was challenging, enjoyable and fun."*
