## Student worksheet: Try these

Fill in the table to find out how much is in each account after one year.
(Round to the nearest pence where necessary.)

|  | Amount in <br> account | Interest rate | Calculated interest | Amount in account <br> at end of year |
| ---: | ---: | ---: | ---: | :---: |
| 1 | $£ 120$ | $3.1 \%$ | $120 \times 0.031=£ 3.72$ | $£ 123.72$ |
| 2 | $£ 350$ | $5.4 \%$ |  |  |
| 3 | $£ 255$ | $4.2 \%$ |  |  |
| 4 | $£ 430$ | $3.5 \%$ |  |  |
| 5 | $£ 290$ | $2.6 \%$ |  |  |
| 6 | $£ 305$ | $2.4 \%$ |  |  |
| 7 | $£ 680$ | $5.1 \%$ |  |  |
| 8 | $£ 550$ | $4.9 \%$ |  |  |
| 10 | $£ 624$ | $4.5 \%$ |  |  |
| 11 | $£ 936$ | $5.6 \%$ |  |  |
| 12 | $£ 1235$ | $2.5 \%$ |  |  |
| 13 | $£ 1235$ | $2.6 \%$ |  |  |
| 14 | $£ 2000$ | $3.9 \%$ |  |  |
| 15 | $£ 3500$ | $5.3 \%$ |  |  |

## Think about

What happens to interest if you put more money in the bank? What happens to interest if the interest rate goes down?

## Compound interest: Try these

Now find out what happens if you leave your money in the account for several years.

Fill in the tables.

|  | Amount f | Interest \% | Interest f | End of year |
| :--- | ---: | ---: | ---: | :--- |
| Year 1 | $£ 400$ | $5 \%$ |  |  |
| Year 2 |  | $5 \%$ |  |  |
| Year 3 |  | $5 \%$ |  |  |
| Year 4 |  | $5 \%$ |  |  |
| Year 5 |  | $5 \%$ |  |  |

|  | Amount $\mathbf{f}$ | Interest \% | Interest $\mathbf{£}$ | End of year |
| :--- | ---: | ---: | ---: | :--- |
| Year 1 | £150 | $3 \%$ |  |  |
| Year 2 |  | $3 \%$ |  |  |
| Year 3 |  | $3 \%$ |  |  |
| Year 4 |  | $3 \%$ |  |  |
| Year 5 |  | $3 \%$ |  |  |

|  | Amount f | Interest \% | Interest f | End of year |
| :--- | ---: | ---: | ---: | ---: |
| Year 1 | £950 | $3.4 \%$ |  |  |
| Year 2 |  | $3.4 \%$ |  |  |
| Year 3 |  | $3.4 \%$ |  |  |
| Year 4 |  | $3.4 \%$ |  |  |
| Year 5 |  | $3.4 \%$ |  |  |

## Think about

What happens to the interest each year?

## Investigate other accounts

Bank: $\qquad$

|  | Amount $\mathbf{f}$ | Interest \% | Interest $\mathbf{f}$ | End of year |
| :--- | :--- | :--- | :--- | :--- |
| Year 1 |  |  |  |  |
| Year 2 |  |  |  |  |
| Year 3 |  |  |  |  |

Bank:

|  | Amount $\mathbf{f}$ | Interest \% | Interest $\mathbf{f}$ | End of year |
| :--- | :--- | :--- | :--- | :--- |
| Year 1 |  |  |  |  |
| Year 2 |  |  |  |  |
| Year 3 |  |  |  |  |

## Bank:

|  | Amount $\mathbf{f}$ | Interest \% | Interest $\mathbf{f}$ | End of year |
| :--- | :--- | :--- | :--- | :--- |
| Year 1 |  |  |  |  |
| Year 2 |  |  |  |  |
| Year 3 |  |  |  |  |

## At the end of the activity

Why is it better to save in a bank or building society than in a money box?

How do you decide which account offers the best rate of interest?
What happens to interest if you leave money in an account? Why?
