

COMPUTER SURVEY

ASSIGNMENT

Task 1

Design a questionnaire that you could use to find out:

- the number of students who own computers;
- the amount of time and money spent by students on computers for work and leisure;
- the most popular types of computer games;
- the different types of computer software used by students.

Design your questionnaire so that you can highlight any differences between the sexes.

Task 2

Carry out a survey using your questionnaire.

Task 3

Write a report of your findings.

This should include:

- a brief description of how you selected the sample of people who completed the questionnaire;
- a copy of the questionnaire;
- your results;
- at least two different types of statistical diagrams to illustrate your results;
- calculations of statistical measures that can be used to summarise your data (use at least two different measures);
- a brief summary explaining your findings.
