

Correlation

Task A

Use the Excel file to find the product moment correlation coefficient between the P1 and S1 results. Then find product moment correlation coefficient for P1 and M1.

N.B.

If there is no result in one column then you will need to remove that person's results altogether.

Task B

Create two scattergraphs to illustrate this data (using Excel or by pasting the data into Autograph). Paste each diagram onto a Word page.

Task C

Write a summary explaining what your results show.
