

## Numeracy Money Management

### Task 1 – Best Buy

Some supermarkets now allow home shopping via their web sites. The two products below are available from tesco.com. For each type of product you are given four alternatives (in different sizes). Your task is to evaluate the best buy for each.

| Product                         | Price |
|---------------------------------|-------|
| Tesco Sunflower Spray Oil 200ml | £1.79 |
| Tesco Pure Sunflower Oil 3l     | £1.87 |
| Tesco Pure Sunflower Oil 0.5l   | 47p   |
| Flora Pure Sunflower Oil 2l     | £1.93 |

| Product                                     | Price |
|---|-------|
| Ross Young Harry Ramsden Oven Chips 1kg     | £1.24 |
| Tesco American Style Thin Oven Chips 1.81kg | 96p   |
| McCain Home fries 2.25kg                    | £2.12 |
| Tesco Organic Straight Cut Oven Chips 907g  | £1.47 |

To obtain a good mark on this task you should present all your findings using tables. You should show all your working and checking.

### Extension

- Choose 3 different products, for example: teabags; breakfast cereal and coffee. Find at least 3 different sizes of the products you have chosen. For each product copy and complete the following table:

| Product | Size | Price | Unit Price |
|---------|------|-------|------------|
|         |      |       |            |

Decide which is the best buy for each product.

And if you wish:

- You are going to organize a party for 10 people. You have £50 to spend on food and drink. Decide what items you are going to buy and show how you decide which of two shops you will use to buy your party goods.
